

RHODE ISLAND JUDICIARY PUBLIC PORTAL ENHANCEMENTS

1. Speed has improved tremendously when producing the Register of Actions (ROA) and documents. Please note for larger cases that have fifty (50) or more records in any of the Case Summary, Case Information, Party Information, Case Events, or Hearings sections, the pages will be divided at the bottom of each section.

IMPORTANT NOTE: For the larger cases (asbestos cases for example) using **CHROME** is recommended.

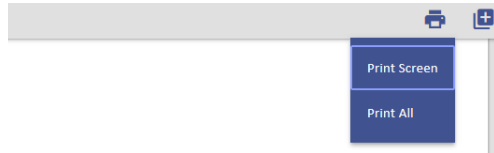

2. There is the ability to “Show All” per section. There is also the ability to “Expand” and “Print” the ROA.

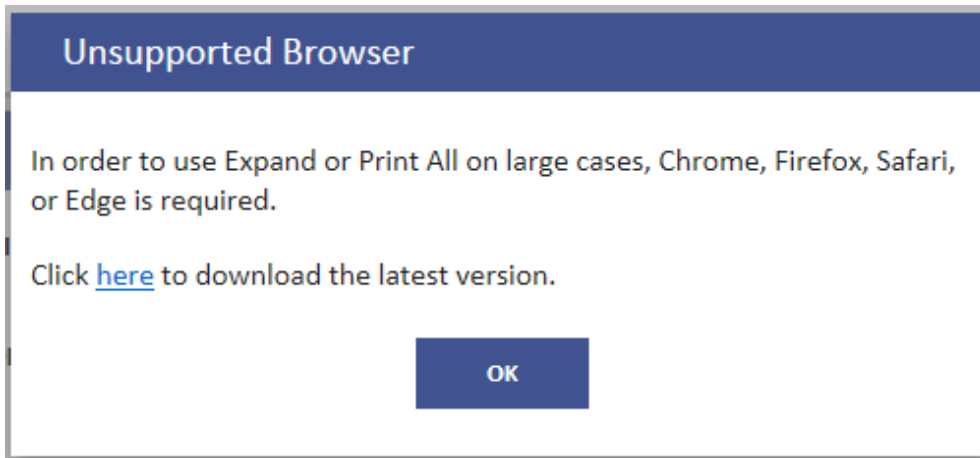

- A. **Expanding the ROA** - Expand the entire ROA by clicking the “+” at the top right corner. (see screenshot below)
- B. **Printing the ROA** - Select the printer icon. Two (2) options will display.
 - i. **Print Screen** - When selecting “Print Screen” it will **ONLY PRINT** what you can view on the screen. If there are more than fifty (50) records in the section, only the fifty (50) records will print.

- ii. Print All - When selecting “Print All,” the entire ROA will print. Please keep in mind if that printing an extremely large case will take a few minutes.

IMPORTANT NOTE: The “Expand” and “Print” features are not supported in all browsers. The message below will display if your browser is not supported for these larger cases.

- 3. You will now have the ability to have the search results, numerous ROA’s, and documents opened at the same time. Each one will open in its own tab at the top. You can toggle between the ROA and documents by clicking on the tab. To exit the document or the ROA, click on the “X” on the tab.
